## Grant Hall in the West

Grant Hall, senior vice-president of the Canadian Pacific Railway, has been taking his annual tour of inspection in Western Canada and is here shown in the grounds of the Empress Hotel, Victoria, with three old friends. They had just returned from a game of golf and the foursome from left to right is: J. E. McMullen, Canadian Pacific solicitor; Mr. Hall; Chief Justice J. A. MacDonald; and E. H. Macklin, president of the Manitoba Free Press, Winnipeg.

## ABBOTSFORD

Representing the Tar Sands Oil Extraction Limited, Messrs. H. A. Stendall of Seattle, J. M. Beckett and G. Russell of Vancouver, and Dr. Hall, of Kansas were in Abbotsford on Tuesday, and gave a demonstration of their apparatus and process. A steam-line connection was requisitioned at the Mill, and a group of prospective investors and a group of efficient the retort method advocated by this company recovers oil from samples of sand claimed to be from the company's deposits in northern Alberta. Several methods have been devised to utilize the rich fuel wealth available in these sand aggregates, but none of them have been heretofore found of commercial utility. The Tar Sands Oil Extraction Limited claim to hold patents for an equipment and methods conceded by the Alberta government to be fully practicable.

Mr. B. Sykes left this week for his hunting grounds east of Fort George, where he will guide a party of Easterners into the grizzly haunts.

Mrs. W. Blinch of Whatcom Road is holidaying at White Rock.

Mr. and Mrs. J. Pearson, who recently arrived here from Texas to take up a pre-emption on Yale road just west of Abbotsford, are erecting a house on their homestead. Mr. Pearson followed mining work for years until he lost the sight of an eye. He is now convalescing from an explosion injury in which he lost two fingers.

Mr. and Mrs. Ralston, Mr. and Mrs. Heller, and Mrs. Heller, Sr. are visiting in Seattle for a few days this week.

A party of Chilliack Sunday School boys made a trip to lovely Liumchin Park, situated in the mountains a few miles above Cultus Lake last week. George Martin, formerly of Abbotsford, toted their packs in on one of his ponies. They had a wonderful time in the Alpine meadows and above the snow line. They picked rare mountain

## CLAYBURN

Miss Emily Gillies, of Vancouver General Hospital, is spending her vacation with her parents.

Mr. W. Fooks has installed a new milking machine.

Mrs. Kirkpatrick has as her guest Mr. and Mrs. Warren and two children from Kerrisdale.

Rev. and Mrs. White are spending a holiday on their ranch at Port Kells.

Mr. and Mrs. Seldon and Miss Betty and Master George are spending a holiday in Vancouver.

Mrs. Good of Aldergrove is assisting in the Village Store in the absence of Miss C. Gillies, who is away on a vacation.

Mrs. E. Wilkinson has as house guests a party of Vancouver friends.

Rev. Mr. Green of Milner conducted the United Church service in Clayburn last Sunday, during Rev. Mr. White's absence on a vacation.

Mr. C. Gough and two sons, who have been camping at Cultus Lake, returned home this week.

Re-shingling and repairing of the roofs of the B. C. E. Electric station at Huntingdon and the Customs building are underway, and painting of the buildings will be done next week. The B.C.E. owns the Customs house.

Provincial government engineers visited Huntingdon this week, and made ditch surveys with a view to providing better drainage of the area. Huntingdon is a government townsite, and this work has been sought for some time by Huntingdon residents.

flowers, and report seeing a bear and a deer. The party left Cultus at 7 a.m. making camp at Liumchin by 5.30 p.m.

Messrs. West and Brockway, aviators made several flights over Abbotsford district last week-end.

## Matsqui Fair Association Loses Display Fixtures In Royal City Fire

Matsqui Agricultural association sustained the loss of about \$300 worth of display fixtures in the New Westminster fair association fire last week, a show-case, stands, and display table used for showing Matsqui's district exhibit. No insurance was carried.

A meeting of the Directorate is called for tomorrow to decide what course the Matsqui association will take in view of this fire.

A total of 536 prizes is offered in the 1929 prize list of Matsqui fair association, several of the divisions, including horses of 20 classes, having a larger and more comprehensive list.

No annual sports program will be held for boys and girls this year during the fair, but will be held on Saturday, August 24. Prize lists for the sports are in course of preparation.

Augmenting the fair prizes this year is the provincial government grant of \$400.

Rev. Fr. Collins, who has conducted services for several years in St. Ann's Church, Abbotsford, has left Chilliwack for Rosland. Rev. Fr. De Lester of Agassiz will now care for the local parish.

Dr. Elliott and the Misses Lord of Vancouver were Sunday guests of Mr. and Mrs. J. Gilmour.

Rising wheat and oat prices are not occasioning any grief among farmers of this Sumas and Matsqui district. An abundant crop is in sight, and better prices can easily be tolerated.

Exalted Ruler Blinch is named to attend the Elks' Grand Lodge convention to be held at Kamloops in August, representing Aldergrove lodge.

## Foundation of National Culture

Two new Canadians from Roumania demonstrate the art of weaving at Regina.

Those who have in the past regarded the New Canadians from Europe as heavers of wood and drawers of water must, after the recent demonstrations at the Great West Festival at Regina, admit that these peoples have, with their native arts, decidedly enhanced the cultural wealth of the country of their adoption. J. Murray Gibson, who sponsored the festival under the auspices of the Canadian Pacific Railway, even goes so far as to say that Saskatchewan and the other prairie provinces have within their borders the foundation of a National culture finer than that of any other nation on earth. To this foundation, the first sod for which had been turned at the previous festival at Winnipeg, all the races which go to make up the peoples of the west have contributed—Icelanders and Irish with their folk-songs and lore, Swedes and Slavs alike with their folk-crafts and dances. Hardly a race known to civilization, old or new, but contributed to the festival some artistry which will make for the further development of that culture which, being national, will be the means of welding to a still greater solidarity, those people who are Canada.

That the movement for the attainment of this end is a popular one was demonstrated by the fact that literally thousands were unable to obtain admission to the exhibits and concerts and that western cities are vying with one another as the site of the next festival.

## Eighty-four and Eight

Wm. Church, 84 years of age, finds a friend in David Wright, 8 years old, on their trip on Canadian Pacific steamer Melita from Montreal to Glasgow. Mr. Church lives at Essex, Ont., and was on a visit to his son in England. David Wright travelled alone from Alberta to Scotland and was tagged by the Canadian Pacific Railway, in whose care he was placed, to his destination. It was hard to say which of the two boys enjoyed the voyage the more.

## Hotel for Summer Vacationists

Let us prevail upon our city friends to arrange spend part of their summer vacation at Abbotsford. Many people usually prefer the changes and country pleasures available in smaller towns, the convenient access we have to all beach, lake, mountain resorts—on both sides of the border. Here the heights, pleasant valley and rippling streams invite lovers of nature—and the utmost in accommodation and cuisine gives you the most cordial of welcome. Rates are very low and everything the most modern.

## Apply the Same Principle

During recent years there has been a decidedly better understanding between the east and the west of Canada and between the Maritime Provinces and the rest of the Dominion, based on closer acquaintance and knowledge of the problems confronting the people in each of the major sections of this far-flung country. There is today far less of sectionalism, prejudice and misunderstanding than in any previous period of Canada's history, and, happily, this spirit of goodwill and co-operation is growing more and more pronounced.

Anything and everything that will tend to promote this wider knowledge and better understanding should be done and encouraged. We believe goodwill and understanding can only be brought about and maintained by frankness and the dissemination of knowledge. That is, eastern people must be made and kept acquainted with actual facts about the west and informed as to the views, opinions and ambitions of the west, and vice versa, western people must be informed in like manner about the east. And it is particularly the duty of the newspapers of the Dominion to discharge this patriotic duty.

It is in the performance of that duty we would draw attention to a recent editorial article appearing in "The Financial Times," Montreal, dealing with the subject of the revision of the Grain Act. To much of that article no exception can be taken, but the whole difficulty is that it is based upon an entirely wrong conception, which fact is made abundantly evident in the concluding sentence of the article, as follows: "The important consideration is to protect the buyer, which will at the same time be a safeguard on the dependable reputation of Canadian wheat in all markets."

This may be the eastern viewpoint, but we submit the western viewpoint, and that is that the word "producer" should be substituted for the "buyer" in the sentence quoted.

The person entitled to receive first consideration in matters affecting the grading, mixing, transportation of wheat is the man who grows the wheat, not the man who buys it, or transports it, or mills it into flour. The status of Canadian wheat in the markets of the world must remain unimpaired at a high standard, not so much for the benefit of and protection of the British or foreign buyer, but in the interests of and to protect the Canadian farmer who grows the wheat in order that he may obtain full value for his product and ample reward for his labor.

Submitting the western viewpoint for the benefit of eastern people, it may well be asked of "The Financial Times," and other exponents of its dictum that in matters affecting the grain trade of Canada the important consideration "is to protect the buyer," whether it, and they, are equally prepared to accept the principle that, in all matters affecting, say, the customs tariff, the important consideration is to protect, not the manufacturer or the financier who has invested in manufacturing industry, but the great mass of consumers of Canada, the people who "buy" the products of these factories?

If it is the "buyer" or the products of the farm who are deserving of first consideration, and who above all should be protected, then pure logic must force acceptance of the principle that it is the "buyer" or the products of the factories who must likewise be given first consideration, and their interests recognized and protected first and foremost in all matters of tariff or other legislation affecting such industries.

In other words, according to the eastern view, as they would apply it to the farmer, it is not the industry that should be protected, or those who have made investments in industry and labor in it, but the buyers of the products created by such industry. The truth is, however, that when these same interests advance tariff and other arguments in their own behalf they directly reverse the principle, and resolutely contend that it is the producing manufacturers who must receive first consideration and be accorded protection, rather than the buyers, i.e. the consuming masses of the Dominion.

Good understanding and complete national co-operation between east and west cannot be built up in this way. It is impossible to apply one principle toward western agricultural industry and an opposing principle to eastern manufacturing industry. The same principle must be applied both east and west.

### Sheet Glass Factory

Calgary May Be Selected As Suitable Place For Establishing Plant

Calgary is very suitable for the establishment of a sheet glass factory, and it may be chosen as the site for such within a year, according to F. S. Hobbs, of Toronto, vice-president of the Consolidated Plate Glass Company, who has been inspecting various cities in Western Canada with a view to locating a branch plant. A big business is being done in plate glass in the Prairie Provinces, he said, making it advisable for the firm to enlarge its present holdings.

### Bad Either Way

Scot. (to friend while visiting London): "Now, mon, I can't stand taxis! When I sit wi' ma back tae the driver, it makes me feel sick, and when I sit wi' ma face tae the taxi-meter, it makes me feel nae better."

"A beautiful girl can climb to success by merely letting people look at her," says a writer. The stare way to fame.

Nearly 2,500,000 tons of rice will be raised in the Philippines this year.

# Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has been recommended for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The sym-

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full direc-

### Settlement Scheme Nears End

Three Thousand Family Settlement Plan Has Been a Success

In a few weeks the 3,000 family settlement scheme will end and no project of like nature will take its place, Hon. Robert Forke, Minister of Immigration, stated recently. There was no desire to make the project an endless one by replacing settlers who had abandoned farms, he said.

The project had been successful in every respect, and Canada had acquired an increase of about 17,000 souls through it. Already 3,250 families had been brought to Canada under the scheme; a total of 520 families had abandoned their farms for various reasons; 34 had been deported; 72 had returned to Great Britain of their own accord, while 414 remained in Canada in other employment, either in agriculture or other work.

### WHAT OUR GIRLS NEED

When Languid, Anaemic and Feeling Run Down

When a girl grows languid, dull and irritable, when her color fades and she becomes pale, you may be sure that the cause is anaemia, or impoverished blood. The bright, red color of the blood is caused by the presence in it of millions of tiny red corpuscles. It is these tiny bodies that carry nourishment from the blood to the tissues. They also cause the glow of health in cheeks and lips. When a girl's blood is deficient in these red corpuscles her body is under-nourished, her nervous system is in danger of a decline. What is needed is an improvement in the quality of the blood, and it is a scientific fact that a course of Dr. Williams' Pink Pills will so enrich and purify the blood that all traces of anaemia and its accompanying weaknesses will disappear. As an evidence of the value of Dr. Williams' Pink Pills in cases of this kind, Mrs. John Finlay, Howland Station, P.E.I., says: "I am glad to take this opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a badly run down condition, very pale, nervous and much under weight. We tried several medicines, but they did not seem to do her any good, so I decided to give her Dr. Williams' Pink Pills. Almost from the start she began to improve, and after the use of a few boxes she had gained in weight, her appetite improved and she had a better color in her cheeks. In fact she had fully regained her former good health. I would advise every mother of young girls to give them Dr. Williams' Pink Pills at the first sign of an anaemic condition."

You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Revising Quota Laws

U.S. Will Admit Double Number Of British Immigrants

Nearly twice as many Britons yearly may enter the U.S. under the immigration quota after July 1. The Senate refused to prevent the national origin clause of the immigration act of 1924 from going into effect on that date.

It follows from the action of the Senate that the quotas of the various nations which send immigrants to the U.S. will be revised. The greatest changes will be in the quotas affecting Great Britain and Scandinavian countries.

British immigrants to the number of 65,721 will be permitted to enter the country as against the old number of 34,007.

Soft corners are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

### Zeppelin's Flight Cancelled

Atlantic Trip Of German Dirigible Postponed Until 1930

A special despatch to the Telegraph Union from Friedrichshafen said that the trans-Atlantic flight to America of the dirigible Graf Zeppelin had been postponed until 1930.

A flight around the world for the big airship was scheduled to start about July 15.

The Graf Zeppelin's last attempt to fly to America ended on May 17, when crippled motors forced her to turn back over Spain.

### Travelling Clinic

The travelling clinic under the direction of the Alberta Department of Health which has rendered splendid service in many outlying sections of the province during the past two years has started on its itinerary for the 1929 season. About 34 centres will be visited and the doctors, dentists and nurses in attendance will follow up the work which has been done in advance by the inspection staff of public health nurses through rural schools.

### Small Churches In England

What is said to be the smallest ecclesiastical building in Britain is St. Margaret's Chapel, Edinburgh. This little church is only 16½ by 10½ feet. Dorset church at Winterborne Thompson, is 23 by 14 feet. Churches at Culbone and St. Lawrence are also small, having less than 420 square feet of space.

Half of the world's supply of aluminum comes from Arkansas. Aluminum is never found in its metallic state, but is always combined with bauxite, granite, feldspar, mica, etc.

### Learn English In Four Months

Two Hundred Word Vocabulary Gives Chinese Working Knowledge Of Language

In New York's Chinatown is a school which teaches a 200 word vocabulary and how to speak English in four months. The school has now turned out about 800 graduates. No one of them could claim familiarity with the language on the basis of the learning it has given him because the course lasts only four months and the total English vocabulary each student has at the end of it, according to Mr. Lum, is about 200 words. Still, he has learned the alphabet, has made an acquaintance with English parts of speech, has at least a rudimentary knowledge of the grammar and has acquired sufficient facility in conversation so that he can inquire his way about the city and, what is more important, take orders and make change as a waiter, clerk or extra hand in a laundry. Most of the students, according to Mr. Lum, are workers in the small Chinese establishments of the city, the restaurants, laundries and stores; some are merchants in their own right. They have come to America as the land of fantastic possibilities for growing rich and hope to return to China within a few years with fortunes—variously estimated at from \$5,000 up—upon which to retire and lead lives of ease. Many of them, with that end in view, work as much as sixteen hours a day, year in and year out, seven days a week and with no holidays except at Chinese New Year, and are content with four hours sleep a night. The school rooms themselves serve as introductions to American life, for they show hardly a trace of anything Chinese.

### Speckled Trout For Jasper Park Lakes

Anglers May Expect Real Sport In Canada's Largest Mountain Playground

So successful was the experiment made by the Dominion Government last year in stocking Maligne Lake, in Jasper National Park, with trout, that a quarter of a million more fry are now growing up in the hatchery there, and will be turned loose in the great glacial lake in a few weeks time.

As eggs, the 250,000 travelled to Jasper from Cresco, Pennsylvania, last winter, and so carefully was the precious freight handled by the Canadian National Express that only 70 of the eggs failed to hatch. Arrived at Jasper, the eggs were given into the care of Warden Herbert Davis, who is carefully nursing them along. He feeds the multitude four pounds of chopped liver a day and keeps the water moving and at a proper temperature.

Early in June the fingerlings will be taken out of their trays and transported in tins to Maligne. "The fish put in there last year," says R. Langford, supervising warden, "have done marvellously well and have grown to a good size. They and the new batch are speckled trout. We expect a shipment of rainbow trout in a few weeks for Cabin Lake."

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders, a most effective vermifuge. It is absolute in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

### Emerald Lake, Yoho Park

Beautiful Emerald lake, in Yoho national park, British Columbia, was first visited by Tom Wilson in 1882 while searching for stray pack horses. As far as is known, he was the first white man to visit this lake.

### Use Minard's for the rub down.

### Refine Gold At Mint

Most of Canada's gold bullion is now refined in the Royal Mint at Ottawa.

Capital invested in the world's rayon industry now exceeds \$500,000,000.

### APPETITE IMPROVED QUICKLY

Enjoy the Taste of Food If you have no desire for food, and you feel out of sorts, and depressed, stimulate your digestive organs. Try Dr. Carter's own formula. These pills taken after meals will aid digestion, relieve the gas, regulate the bowels, expel constipation poisons and arouse appetite. All Druggists 25c and 75c red packages.

**CARTER'S LIVER PILLS**

### Protects Ship Against Fire

Modern Liners Have Device For Instant Detection Of Smoke

The captain on a modern liner can look into a cabinet and tell at a glance whether fire has broken out, and also in what part of the vessel. Go into the hold of any properly equipped ship and light a cigar; in less than five minutes the captain on the bridge can tell where you are smoking. In the captain's cabinet is a series of glass-fronted tubes, one for each hold, through which air is constantly flowing. Ordinarily you can see nothing—all is black; but with the faintest trace of smoke from the hold there suddenly appears against this black background a thin, quivering thread of blue. For within the tube is a shielded bulb of brilliant light. As long as the air current is pure there is nothing to illuminate; but the moment a wisp of smoke flows through, the light rays make it show up against the black background like a meteor.

There are other fire-detecting devices also—devices that betray a fire at the slightest change in temperature. It is after they have performed their part that the modern fire extinguishers are brought into play. These are pipes which by the simple turning of a valve, without opening the hatch or the hold in which the fire has started, can fill that hold with live steam, in which no fire can live. Or one can flood the hold through the same pipes with carbon dioxide, and again the fire is out, with negligible damage to most classes of cargo. Or the hold can be flooded with a substance that flows over the flames like a blanket on thin foam and smothers them.

### Newspaper Is Best Advertising Medium

Result Of Recent Experiment Told By Business Expert

Roger Babson is one of the outstanding business experts of the world, and his words are eagerly watched by men in the highest places in business life, because they carry much weight. Recently Mr. Babson tried an experiment in advertising, and the results of this test are worth passing on to others.

In his experiment, the purpose of Mr. Babson was to test the relative drawing powers of radio and newspaper advertising. At a cost of \$3,000 he broadcast an advertisement by radio. He received sixteen enquiries and two orders as a result. A few days later, he printed his advertisement in five newspapers in different cities, at a cost of \$3,000, and he received 4,000 replies.

On a basis of cost, the radio advertising cost him \$166.66 for each reply, while the newspaper advertising cost only 75 cents per reply.

As an actual test, made by a man whose findings in business matters are challenged, this is worth a great deal to those who find it essential to use advertising for business building purposes. There are many firms, of course, which use both the radio and the newspapers for advertising purposes, but if they all have the same experience as Roger Babson, the latter medium is the only one which is bringing much in the way of profitable results.

### Balloon Makes Long Trip

Released In Sweden Made Trip Across North Sea To England

A Swedish toy balloon has just made a safe crossing of the North Sea, and landed in Yorkshire, in England. It was given away, with many hundred others, by a department store in Malmoe, in the southern Swedish province of Scania, and let loose by a youngster there.

On the diminutive gas bag was printed the name and address of the store, for advertising purposes. The other day the manager of the store received it in the mail from a person in Yorkshire. It was deflated and wrapped in paper, but quite undamaged.

### Scots Proud Of Canada

"Scotland, and Glasgow in particular, are proud of Canada for the part she is taking in trans-Atlantic shipping," said T. L. Duff, well-known Glasgow ship owner and broker, who was in Banff recently. "The building of a ship directly employs upwards of 5,000 craftsmen on the Clyde," he added, "and the supplying of the materials and fittings required in its construction indirectly benefits industries throughout Scotland."

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Exterminator is an excellent medicine to destroy worms.

### Double Jeopardy

A correspondent assures us that the following notice has been posted around about an electric station in Donegal: "Beware—To touch these wires is instant death. Anyone found doing so will be prosecuted."

Professor—Go your fastest, my man! I am in a desperate rush.

Taxi Driver (after speeding along for 30 minutes)—Say, you forgot to tell me where we're going.

Employers don't pay enough; employees don't work enough.

In the fine old days of side burns and beaver hats, the name McClary meant almost as much to good housewives as it does in these Modern Days.

### Declares Allies Fear Of Germany Absurd

Only Nation Without Arms Says Minister Of Defence

Dr. Wilhelm Groener, minister of defence, in a speech reviewing Germany's military policy charged that the states victorious in the world war have done nothing along disarmament lines and endeavored to show that it was absurd for the allies to claim they could not disarm until they were sure of not being attacked by Germany.

Speaking of present military forces, he said:

"France has, on European soil, 27 divisions; Belgium six; Poland 30, and Czechoslovakia 26 brigades, a total of 76 divisions compared with Germany's seven. Who, I ask, needs security? I can't leave unmentioned that besides these troops, the other nations also possess aviation squadrons, heavy artillery and powerful reserves of trained men and war material of a kind we do not possess at all."

### Canadian Jersey Breeders

Good Market In States For Canadian Bre'd Jersey Cattle

Writing from Tupelo, Mississippi, W. Elmo Ashton, fieldman for the Canadian Jersey Breeders' Association, points out that it is apparent to anyone going through the States of Georgia, North and South Carolina, Mississippi and Alabama that the southern states offer a great market for Canadian Jerseys. In the past year and a half these states have taken from Canada over 300 head of young bulls and heifers.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

### Believe It Or Not

A small tortoise, on which Mrs. Sarah Blair, now dead, carved her initials and the year "1862," 67 years ago, has been found by her daughter, Miss Mary Blair, within a mile of the original Blair home at Scottsburg, Ind.

Our idea of wasted energy is the honking of an auto horn for the purpose of getting a horse-drawn vehicle at the head of the line to speed up.

With a population that ranks 28th among the countries of the world, Canada is fifth in total exports and third in total turnover of trade.

### Putting Two Great Emphasis On Youth

Modern System Forgets That Judgment Comes With Years

The old world has not lost its reverence for age. It seems to be the misfortune of a young country to put more emphasis on youth than age. The demands of pioneering life, the demands of modern factory life and the many demands of the rather fevered and highly artificial life of the present day put perhaps an altogether too great emphasis on youth. Time and again occasion arises where the sad story is all too patent of discrimination against age and replacement by youth. The modern factory system, with its ever newer machinery tends to discard the aged and employ youth, with much consequent hardship. It is sometimes forgotten that judgment comes with years and an active mind may by constant use be only a much more tempered and highly developed instrument when years have left youthfulness in the distance.—Halifax Chronicle.

For Catarrh.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Gimoy, considered one of the most weather-beaten places in northern Norway, has a new church. To prevent its being blown away it is anchored to the rocks by heavy chains.

Fruit growers in Porto Rico have developed a lemon which is said to be as large as a grapefruit and sweet enough to be eaten without sugar.

"At the circus there was a girl who rode beneath the horse, on the horse's neck, and almost on his tail." "That's nothing, I did all that the first time I rode a horse."

Many a so-called orator is merely a human phonograph.

### In The Locker Room

Minard's is the stand-by of those who take care not to suffer from stiffness and aching muscles.

**Foods Stay Fresh Longer This Way**

Covered with Para-Sani Heavy Waxed Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

Western Representatives: HUNTER-MARTIN

# Consumption Of Wheat Found To Have Declined Considerably In Recent Years

Is wheat bread no longer the stout staff of life it used to be? Statisticians whose business it is to look into the matter find that the consumption of wheat has shrunk from 5.6 bushels per capita in 1913, to 4.3 bushels per capita in 1926. Into the cause of this decline the United States senate has ordered the secretary of agriculture and the secretary of commerce to investigate. These two departments of the Washington government are to report to the senate not later than the beginning of the session of congress which meets in December.

The result of that inquiry will be interesting to all countries in which wheat is produced on a large scale, and to no country more than to Canada. They will be curious to know if people are changing their habits of eating, and are finding more satisfaction in supplementing their grain food by other edibles. That there has been a remarkable increase in the consumption of green vegetables and fruits and of preserved vegetables and fruits is a notorious fact, but it would be surprising to learn that the consumption of these foods has gained upon the consumption of wheat products so as to displace almost 25 per cent. of the latter. Green vegetables and fruits in the form of salads have undoubtedly taken a considerable percentage of the demand that formerly went to meats, but their part in lowering the consumption of bread was not generally suspected to be great. Yet let any observer of people who take their lunches at cafeterias speak and he will probably say that it is noteworthy how generally they pass by the bread rolls and biscuits to fill their order from other edibles.

Tastes change, new appeals to the appetite are brought forward, and the advice of dieticians is being followed as it never was followed before. It seems improbable that the decline in the consumption of wheat bread is owing to enforced frugality. A very large part of the world's population can afford better meals than they could before the war. If, as appears to be the case, people diversify their foods more than in former times, the hint should be taken by our western farmers to diversify their agriculture and produce more kinds of foodstuffs than they now produce.—Mail and Empire.

## Realizes Importance Of Canadian Trade

### France May Make Another Trade Treaty With Dominion

France regards Canada as one of the best fields for monetary investment in the world and realizing the importance of the Dominion appears likely soon to enter into another trade treaty with this country, wider in scope than the one now in effect, in the opinion of Hon. Philippe Roy, Canada's minister to France. Mr. Roy who was in Vancouver, planned a trip into the Peace River District before returning to France.

Both France and Canada appear to realize the advantage of further mutual trade concessions said Mr. Roy, and a growing trade between the countries can be expected. Mr. Roy also visited Edmonton, which was his home prior to 1911.

"I want to see all of this country that I can," he said, "because I am going to do a great deal of talking about it when I return to France."

### The Wrong Tickets

It was dusk and the ticket inspector went to the young couple on the back of the bus.

The youth, slightly impatient at the interruption, thrust out his folded tickets.

"We do not stop there," said the inspector courteously.

"Where?" inquired the youth.

"At the pawnbroker's."

"First Woman—My husband is so nervous. If the slightest thing goes wrong he loses control of himself. I hope yours isn't like that."

"Second Woman—Mercy no! Bob is as hard to rattle as a feather pillow."

Every owner of an orchard or rascal patch seems to hate boys.

"How much is this book?"

"The proper price is eleven lire, but the author has signed his name in it, and so"

"And so I may have it cheaper as a damaged copy?"—Il Travaso, Rome.

## Measuring Ocean Depths

### Use Of Explosives Has Been Found Satisfactory Method

For determining the exact depths of the ocean, the U.S. coast and Geodetic surveyors are using depth bombs. Depth measurements are dangerous unless properly located on the charts, as an error in location may mislead navigators by indicating depth where it does not exist. Soundings made in sight of land are easily located with the aid of objects ashore, but when the work is done in fog or out of sight of land, the visual method is supplanted by the use of explosives. The method is simple. After each measurement a small bomb containing TNT is dropped overboard to explode 20 feet below the surface. The sound, travelling under water, is picked up by two hydrophones fifty feet below the surface at known positions near the shore stations, which are several miles apart. From these it is carried by cables to radio amplifying and transmitting sets ashore, which broadcast the sound. This in turn is caught by an apparatus on the ship and recorded on a tape. The surveyors compute the elapsed time between the actual explosion and the return of the radio signal. By using the known velocity of the sound through sea water they are able to determine the distance of the ship from each of the two shore hydrophones. Triangulation then establishes the ship's position with absolute precision. The method has been found accurate up to 200 miles.

## Moose Jaw a Milling Centre

### Is Now the Second Largest Milling Centre In Western Canada

Moose Jaw is now the second largest flour milling centre in Western Canada. The Robin Hood Mills produce 4,000 barrels of flour, 1,250 cases of cereals and a heavy tonnage of standard stock foods every day. Moose Jaw is also the Prairie livestock centre and headquarters of the Saskatchewan Feeder Show and Auction Sale, with 3,000 head of cattle and 10,000 sheep on show and sale every October.

## NOVEL TWO-PIECE DRESS

Novel ideas now appear on frocks for the younger fashionables. In Style No. 875 for instance, the separate blouse with inset chemise is gathered into band at lower edge to affect smart tuck in type. The two-piece skirt with plaited insets, is attached to an underwaist. French blue linen with white vest, printed sateen, blue and beige jersey, printed and plain silk crepe, dainty printed wool challis, colorful rayon and wool crepe are smart and serviceable. Pattern comes in sizes 6, 8, 10, 12 and 14 years. For the 8 year old miss 1 1/2 yards of 40-inch material with 3/4 yard of 36-inch contrasting, and 3/4 yard of lining is all that is needed. Price 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

## How To Order Patterns

## A Real Optimist

"Now, young sir, what is it you want," said an old woman who kept a toffee stall to a little boy.

"Nothing missus," replied the lad; "I just come to see what I might have got if I hadn't lost my penny!"

## Work Will Be Extensive

### Group Of Scholars To Make Scientific Study Of Settlement In Canada

In a statement issued by Dr. W. A. MacIntosh, of Queen's University, announcement is made that at a recent meeting held in Ottawa by a group of scholars from Canada and the United States interested in the social sciences, plans were laid for carrying out a scientific study of settlement in Canada. The purposes of the investigation are:

(1) To appraise the natural resources of the pioneer regions; (2) to study methods of settlement with a view to avoiding the waste of life and capital that was characterized by pioneer settlement in the past; (3) to trace the successive stages of utilization of natural resources and the effects on economic and social institutions.

The study is under the general supervision of a committee of the American Geographical Society, which is responsible to the financing institution for the completion of the study. Two of the committee are Duncan McArthur, professor of history, Queen's University; Dr. W. J. Rutherford, dean of the school of agriculture, University of Saskatchewan.

As director of research for the Canadian project, the committee has appointed Dr. W. A. MacIntosh, professor of political and economic science, Queen's University. Associated with him is a Canadian pioneer problems committee, consisting of Dean W. J. Rutherford, University of Saskatchewan, chairman; Prof. D. A. McArthur, Queen's University, vice-chairman; Prof. Martin, University of Toronto; Prof. Albert A. MacGibbon, University of Alberta; Prof. C. A. Dawson, McGill University; Prof. R. W. Murchie, University of Manitoba.

Work has already been commenced and investigations will extend over three or four years.

## Buffalo Herd Menaced By Wolves

### Pack Of Wolves Play Havoc With Buffalo In Slave Lake Reserve

Wolves are taking a heavier toll of buffalo from the Slave Lake reserve than Indians or disease, states J. G. D'Aoust, former warden in the reserve, who has just reached Edmonton from the north.

There is one pack of wolves in the park, between ten and fifteen in number, which kill upwards of a hundred buffalo each year, despite the efforts of the ten guardians who are continually hunting the grey killers. D'Aoust was stationed on Slave River, 35 miles north of Chipewyan and patrolled a line some 65 miles in length. In this section alone he found the remains of 11 buffalo that had been killed by timber wolves during the past winter.

Although upwards of 10,000 buffalo have been shipped into the reserve by the government, D'Aoust declares that at the most there are not over 5,000 animals here now, including the original herd of 1,500 wood buffalo. He estimates that 75 per cent. of the yearlings shipped in have died from injuries received in transit and the flies which they had to face on being freed.

Indians living on the area enclosed by the reserve at the time it was set aside are permitted to continue to trap and hunt there, but they cannot kill any buffalo. It is very rarely that they break this regulation. Whites are not allowed to hunt or trap within the reserve.

## If People Had Time

Many Have Delusion That They Could Become Famous

Isn't it funny, too, how many of us harbor delusions that we could become famous or wealthy if we had time. We think that we could write a novel, or a play, or maybe a movie scenario—if we had time. Or perhaps we could develop a new rose or a gladiolus, or an iris, that would make our name known throughout the horticultural world—if we had time. Or we might write poetry—if we had time. All these make pleasant dreams, but each of us has "all the time there is" and it is most likely that, if we were forced to take a chance, we would suddenly begin to do the things we have always thought we wanted to do.

## In Motor Language

Little Willie had been hearing his father boast to his friends of his new car and its ability to take the steepest hills. At the Sunday supper table he suddenly astonished his parents by demanding:

"Pa, does the Lord Almighty own a Rolls-Royce, too?"

"Great Scott, no, son. Whatever put that into your head?"

"Well, at Sunday school we had a hymn that went, 'If I love Him, when I die, He will take me home on high.'"

## Makes Him Skeptical

The old copy-book favorite, "Lightning never strikes twice in the same place," finds Antooze Sakey, of Boston, a bit skeptical. Recently a motorbus plunged through the display window of his fruit store, demolishing his soda fountain and several counters. Two years ago, a taxicab entered the store in a similar manner. On that occasion the cab driver stepped down from his wrecked machine, lit a cigarette, and said: "I'll have a strawberry frappe."

## For Land Settlement

J. F. Weston, vice president of the Colonization Finance Corporation of Canada, Ltd., and managing-director of the Imperial Life Insurance Company. The Colonization Finance Corporation has entered into an important agreement with the Canada Colonization Association for the settlement of privately owned lands, tlement of privately owned lands, says the Department of Colonization and Development, Canadian Pacific Railway.

## Solves Old Problem

### Geological Survey Tells What Becomes Of Rain Water And Snow

What becomes of the rain water and snow?

The question has been answered by the geological survey of the department of the interior, at Washington, after a three-year study of Pomperaug Basin, in Connecticut, which is regarded as a typical area.

Of about 44 inches of water that falls annually in the basin as rain or snow, 21 inches flows out through streams. Twenty-three inches of it is returned to the atmosphere by the process of evaporation from the soil, water surfaces and surface objects, and from being drawn up by roots of plants and given off through their leaves.

Of the 21 inches that is carried away by streams, 12 inches never gets into the ground but immediately runs off, while about eight inches of the river water first finds its way underground and reappears in springs and seeps.

## Encourage Sheep Raising

### Project Launched In Manitoba To Place More Sheep On Farms

The plan recently launched by Lieut.-Governor J. D. McGregor, of Manitoba, to place more sheep on farms of the province, and which led to the formation of the Manitoba Livestock Credit Company, to finance the project, is making headway in the Brandon area. A committee has been appointed, with J. C. Riddell, manager of the Canadian Bank of Commerce, as chairman, to handle applications for sheep. The committee reaps no pecuniary gain and railways, banks and other large financial bodies are backing the project.

## Canadian Grasses

### Scientific Study Will Result In Increasing Value Of Pastures

The scientific study of Canadian grasses has brought such good results that the Canadian farmer, in certain circumstances, will be able to triple the value of his pasture, Dr. Frank T. Shutt, Dominion chemist from Ottawa, told the Dominion Chemical convention at Toronto, in the course of an address on the subject of the experimental farms.

## Road To Sherritt-Gordon Mine

With the roadbed complete, laying of steel on the 42 mile railway branch, Cranberry Portage to Cold Lake, to serve Sherritt-Gordon, has started, and by the end of August the job should be near completion. Sherritt will then take in its 1,500 ton mill.

The man who pays his debts promptly is wise enough not to owe much.

## Poultry Registration

### Growing Demand For Stock Of Registered Parentage Is Shown

The Egg Laying Contests carried on by the Federal Department of Agriculture at the central farm, at Ottawa, and at certain of the experimental farms throughout the provinces, has for one of its chief objectives the discovering of qualifications in individual birds for registration. In a report of the eight contests that have been held up to the end of 1927, issued in Bulletin No. 108, of the Department of Agriculture, at Ottawa, it is shown that 4,492 birds had qualified for registration. Of these, 4,130 were females, and 362 males. Females to qualify for registration are required to lay at least two hundred eggs weighing at least 24 ounces to the dozen during the fifty-one weeks under test. A male to be eligible for registration must be the son or grandson of a registered female, and his sire and grandsire must have been approved male birds, or the son of a registered male, and at least a second generation registered female. Both males and females are also required to pass inspection as to standard qualifications, constitutional vigour and breed type. This report indicates an enthusiastic appreciation of the registration work which is shown by the increasing numbers of birds entered for test each year and the growing demand for stock from registered parentage.

## Importing Sheep From England

### Five Head From Royal Flock Purchased By B.C. Breeders

Sheep from the famous flock of His Majesty, King George, are being imported on Vancouver Island and will soon arrive at their new pasture in the Sooke Hills.

C. E. Whitney-Griffiths, director of the Canadian Sheep Breeders' Association, who with his brother is one of the largest-purched-sheep breeders in British Columbia, has purchased five head from the South-down flock which was started many years ago by the late King Edward, when Prince of Wales.

Introduction of new blood is said to be urgently needed to improve the flocks in this province, and nowhere can this be better obtained than by the importation of pure-bred stocks from some of the noted sheep districts of the old country, according to breeders at Victoria.

## Decline Of Oratory

### Debates In Parliament Are More Business Like Than Formerly

The fact that orators are now few and far between in Canadian public life—in marked contrast with the number who flourished in the decades immediately succeeding Confederation—is quite often made the subject of comment. But it cannot be denied that the proceedings of the several Parliaments of the Dominion are now conducted in a much more business-like manner than was formerly the case and that in spite of the decline in oratory, the tone of debate is much happier and less vitriolic than was formerly the rule.—Brookville Recorder and Times.

## Started Ten Years Ago

The movement for the preservation of national historic sites in Canada dates back to the year 1919. Representations were made then to the Dominion Government urging the necessity of a national organization for the preservation of historic sites and as a result an honorary Historic Sites and Monuments Board was created. This board is composed of a number of eminent Canadian historians who have given their services without compensation.

## Sunday School Teacher

(of the deluge): "And then it rained for forty days and forty nights."

Bright Pupil: "And were the farmers satisfied then, teacher?"

"Hey, there, don't you dare park that car of yours near my horse."

"Don't worry, I know the city rules are not to park near a plug."

## SUN PARLORS FOR CANADIAN TRAINS

Parlor cars with glassed-in observation platforms are the latest addition to the equipment which the Canadian National Railways are using on their trains between Winnipeg and Duluth and the boat trains between Winnipeg and Port Arthur. Vita glass is used in these sun parlor cars, this type of glass letting in 75 per cent of the violet rays—the health-giving part of sunlight—which are not able to pass through ordinary glass. The size of the windows permits unobstructed vision of the scenery and the cars have been tastefully decorated and furnished. They represent the most up-to-date type of rolling stock in use on the continent.

# American Universities To Put On Special Course For Criminal Research Work

## A Versatile Apple Tree

### Produces Eleven Varieties As Result Of Grower's Experiment

As the result of a practical joke on Nature, 11 different varieties of apples may be picked from one tree in Luther, Michigan. The tree stands beside the summer home of Capt. Louis E. Pape, of the Detroit fire department, and began life originally as a bearer of Northern Spys.

Farmers who come to town in the late summer or early fall never fail to study the curiosity. It yields big apples, little apples, red, yellow and green apples, mottled, speckled and streaked apples—apples for every palate and domestic usage. It is a succession of orchards concentrated in one tree.

In the spring the tree holds true to its eccentric nature by blossoming piecemeal. No two varieties put forth their petals at the same time, and when some are finished with their blooming, others are just beginning. The season of greatest wonder, however, is the fall.

One side of the tree is heavy with big yellow transparencies, while the next limb is loaded down with brilliant red Jonathans. Near the top, the greenings sparkle like emeralds, and directly below are several bushels of winesaps. The other varieties, in addition to the Northern Spys, are Ben Davis, Maiden Blush, Wolf River, Baldwin, Astrakhan Red and Snow apples.

John Prout, Ionia apple grower, used the tree for his grafting experiments. Succeeding in his first attempts, he set out to see how versatile he could make the old tree.

The tree has innumerable advantages over the orthodox apple bearer, according to Mrs. Pape. When she wishes apples for pie, she picks the greenings, and when eating apples are desired, she singles out the transparencies of the Winesaps, Jelly-making causes the harvesting of the Ben Davises.

## Using Lumber From B.C.

### Japan Takes Millions Of Feet Yearly For Making Bathtubs

Millions of feet of British Columbia lumber are being used each year in Japan in the manufacture of bathtubs, according to a Vancouver man who recently visited the Orient with a view to the disposal of Canadian lumber.

"The Japanese," he stated, "are devoted to bathing as a sort of pastime. The Japanese who does not take a bath once or twice daily is a rare individual. Every house, even the smallest cottage, possesses a bath tub of some sort. They use 156,240,000 feet of lumber in manufacturing tubs, and of this much is British Columbia fir or cedar."

Most of the Japanese cling to the habit of sleeping on the floor, and for that reason they prefer British Columbia hemlock rather than fir for flooring, because there is not so much resin in the wood and it does not sliver when dried out.

Leather shoes are the footwear only of the rich. The great masses of the people wear wooden shoes or "gita." The gita absorbs perhaps one board foot of lumber for each pair, nearly a million feet of lumber being used annually for this purpose.

## Contradictory Travel

### Possible To Drift Down Stream On Mississippi And End Journey Far Up Stream

It is hard to realize the possibility of drifting down stream in order to travel up-stream, yet at one place in the world it is possible to set off down stream in a canoe and end forty-five miles farther up-stream without apparently turning back. This was done by an Indian on a stretch of the Mississippi known as the Grenville Bends, consisting of many loops and curves continually doubling one on another. The Indian started at one of the lower bends and floated down stream until he came to a narrow neck separating him from the next loop up-stream. A "carry" of a few hundred feet brought him to a higher reach of the river. The operation was repeated again and again—floating down, carrying over, floating down, and carrying over. Then by floating down stream sixteen miles and carrying his canoe a short distance on foot, he was forty-five miles farther up-stream than when he started.

## Poison Gas

A monument was recently unveiled at Steenstraete commemorating the first German attack with poison gas. The inscription reads: "On April 22, 1916, the troops of the 87th Territorial Infantry Division and the 45th Infantry Division were poisoned by the first cloud of gas. Since then, the victims of that abominable method of warfare have died every day in peace time."

When married people get along it isn't always love; it is often common sense.

Indignant at the growth of crime on its body politics, its reputation smirched by the smoking guns of gangsters, the City of Chicago will cradle its own potential deliverer—the super-detective.

This creature, heretofore only a myth of fiction, will be made into flesh and blood to replace the policeman whose chief qualification often is but a stout heart.

Two of America's leading universities, both in Chicago, have hung up handwriting on the wall for the heretofore undetected murderer, thief, firebrand, kidnapper, racketeer and other transgressors on the peace and comfort of society. Police work will henceforth be a part of the curriculum at Northwestern and Chicago universities—and racket-ridden Chicago will be their research laboratory.

August Vollmer, chief of police at Berkeley, Calif., will head the new department at Chicago, and will inaugurate the course at the beginning of the fall semester next. October, Leonard White, professor of administration and chairman of the local community research committee at the university, who worked on the plans with Chief Vollmer, said that while the course will be confined at the outset to the problems of police administration, it will become eventually a major study in which the student may work for a degree.

Every avenue of learning that can aid in the tracking down of a criminal will be thrown open to the embryo detectives, White said. The course eventually will be designed to permit special study of one or two years as well as the full four-year college course for those who wish it.

An inter-departmental committee will co-operate with Professor Vollmer to see that his students are well-grounded in all the sciences necessary to intelligent investigation.

The student undertaking the full course will study the chemistry of poisons, criminology, sociology, psychology, physics and anthropology and learn to apply the studies to the investigation of crime.

## West Produces Finest Wheat

### German Miller Has High Opinion Of Wheat Grown In Western Canada

Wheat from the Prairie Provinces of Canada is the finest received in Germany from any country in the world, according to Johann Lange, one of the seven German millers making a tour of the North American wheat-growing and milling centres. "Canadian mills are second to none, if mills visited in Winnipeg may be accepted as representative of Canadian plants," said Mr. Lange. "In operation, cleanliness and the beauty of the flour turned out we have seen nothing better since we arrived on this continent."

## Exhibit Canadian Furs

### Proposed To Send Collection To Fur Exhibition At Leipzig, Germany

An exhibit of Canadian furs valued at \$75,000 will be included in the fur exposition in Leipzig, Germany, this summer, if plans of leading Canadian buyers mature. Consideration is now being given by Hon. James Malcolm, Minister of Trade and Commerce, to a proposal that the Government bear the expense of erecting and staging the exhibit. A collection of the most beautiful furs produced in this country is being made for the purpose.

## Getting It Right

A certain lady, mother of a star, nails from an interior town where names are pronounced as they are spelled. So when she announced to a group of her daughter's friends that she enjoyed her vacation at La Jolla (pronouncing the word as it is spelled), her daughter said:

"Dear, that is pronounced La Hoya—remember I is always H."

She remembered. And a few days later at a movie function some one inquired how long she was remaining in Hollywood.

"Through Hoon and Huly," she beamed.

Instead of using tacks to fasten a curtain on a roller, try using inch-wide adhesive tape.

"Mother, that lady must be very poor."

"Why?"

"She hadn't enough cloth to make a coat, and she had to lengthen it with fur."—Lustige Kölner Zeitung, Cologne.

## Summer-Day Wash Fabrics

Cool, sheer, fast-color yard goods. Light, new fabrics in those color blendings and shades which are most in demand this season—in single-tone and multi-colored effects.

You will find included in our stock the most popular class of summer WASH FABRICS for

## MATSQUI SCHOOL SPORTS TO BE HELD AT GIFFORD AUG. 24

Representatives of Matsqui School Board, Parent-Teachers' Association, and Fair Board met in Gifford hall on Monday to further arrangements for the annual field day for school pupils. The date had been tentatively set for Friday, August 23, but it was found that this would conflict with the Fraser River Festival in Abbotsford on the same day, date of which had been announced several months ago. After some discussion it was decided to hold the sports on Saturday, August 24.

Messrs. Hill and Heller attended the meeting in behalf of the Flower Festival committee, inviting the interest and participation of the sports committee, and the free attendance of all school children in Matsqui to the floral displays in Gaisley hall, Abbotsford, on Friday, August 23. As a program of sports events, with baseball and football games, is to be held on Jubilee grounds in conjunction with the festival, a suggestion was made that Matsqui and Abbotsford public schools might join in promotion of big annual school sports tournament. The meeting appeared to favor this proposal, and the various representatives promised to enlist the consideration of their respective organizations with a view to arranging a program for 1930, it being too late to alter this year's plans.

As a donation towards the Matsqui school sports, an offer was made by the Jubilee Recreation Association of free use of Jubilee grounds and the big hall on August 24 or at any date previous to the Flower Festival, the sports committee to pay janitor's fee for the night, and the cost of lights. The meeting passed a vote of thanks for the offer, but decided to hold the day's program at Gifford, as had been arranged. The Secretary of the school sports committee reported that more than \$50 had been collected for the prizes.

Notwithstanding unofficial assurances that foreign settlement of Sumas lake area would not be permitted by the provincial government, some anxiety is expressed by resident farmers of Sumas district that if a private realty company secures control of the lands, a discrimination against undesirable settlers might not be made, provided they were willing to pay the price—which certain of them undoubtedly are.

Personnel of the proposed Sumas-Abbotsford Consolidated High School Board has been named as follows: Trustees Fadden, Boley, Pratt and Webster.

L. C. Waddington, principal of Huntington school, is taking the teachers' summer school course in Vancouver.

Mrs. Everett, Delair road, is holidaying at White Rock.

## ABBOTSFORD

Mrs. Collin Fraser's two children Dora and Billy were operated upon on Saturday in the M.S.A. hospital for the removal of tonsils.

The Mill shut down for the half day last Saturday to enable some repair work. Full-time operation is now anticipated until the annual shut-down after Christmas.

To facilitate easier handling of long timbers, which run up to 80 feet in length, a trailer is being added to the big saw at the mill.

Mrs. H. McKinnon entertained a number of old-time friends on Saturday in honor of her mother, Mrs. Miller whose 83rd birthday occurred on Sunday July 21st. After a pleasant social time during which Mrs. Miller happily recalled olden days with some of those present; dainty refreshments were served including an 83 candied birthday cake.

Those present included Mrs. Hicks, Mrs. H. Fraser, Mrs. McCrimmon, Mrs. J. Ware, Mrs. A. Lee, Mrs. P. Wilson, Mrs. B. Fraser, Mrs. Stirling, Mrs. F. McCallum, and Mrs. E. R. Wainwright.

Mrs. A. Thompson visited Mr. and Mrs. Eyres in Chilliwack on Sunday.

Miss McCallum is holidaying at White Rock.

Mr. and Mrs. Kirkpatrick of Burnaby were week-end guests of Mrs. H. Fraser.

Mrs. Newby of Calgary and Mrs. Stewart of White Rock were week-end guests of Mrs. J. Ware.

Mrs. McMenemy and daughter, Mrs. A. Eyres visited friends in Abbotsford recently.

Mr. and Mrs. B. Fraser of Vancouver spent Sunday with Mrs. H. McKinnon.

Mrs. B. Sykes visited in Seattle at the week-end.

Howard Little has returned to Englewood.

Miss Helen McAdam is spending her holidays at Englewood, the guest of Mr. and Mrs. F. Fossett.

Lee and Willie Combs came up from Vancouver to spend the week-end.

Mr. Art. Zettergreen spent the week-end in town visiting friends.

Howard Selby was in Abbotsford for the week-end.

Mrs. Dan Winton is in Abbotsford awaiting a tonsil operation, having come here from Harrison Hot Springs, where she went for treatment.

Miss Martha Almas spent the week-end in Abbotsford.

Mr. Andrew Frey has opened his service station at the corner of Yale and Mt. Lehman road.

Mrs. H. J. Fraser left this week by auto for Salt Lake City, in company with her daughter, Mrs. J. Steffen.

Mr. Estlin, former managing-director of the B. C. United Oil Company, a concern which started to drill for oil on McCallum road in Abbotsford six years ago, was in Abbotsford last week. It is likely that the shareholders of the dormant company will be made an offer on their assets, if any, by the B. C. Alberta Oil Co.

Mr. and Mrs. Wm. H. Heller of Edmonton are visiting their son and daughter-in-law here.

## Hands Up!

Edna E. Christoffsen, world's champion (33) pistol shot, photographed in the grounds of the Empress Hotel, Victoria. She is a member of the Portland, Ore., police force and won the women's revolver shooting contest at the police sports at Victoria and Esquimalt recently. Competing with Seattle, Portland and Vancouver police three years ago, Mrs. Christoffsen was within a mark of the open championship and easily tops all women revolver shots in the world.

## MATSQUI

D. G. Beckerton of New Westminster has joined the Bank of Commerce staff at Matsqui as assistant to Mr. Paterson. J. Olsen is confined to his home with a threatening mastoid disorder.

A number of Matsqui residents have decided to engage boats next week and search for the body of Harvey Giffin, if it is not recovered. Some hold the opinion that because of the temperature of water at the depths over 100 feet, putrefaction is likely to be very slow, and the body may never rise.

Mr. Donaldson, brother-in-law of the late Harvey Giffin, has arrived in Matsqui from Boston, and will institute a further search for the body and arrange the winding-up of deceased's estate.

Raspberry picking is in full progress in the Matsqui district, Messrs. C. R. Crist, O. Sorenson, L. Smith and others being busy getting their crop harvested. Hay is in full progress all over this district, and the crop is abundant.

Two 22-inch trout, one a speckled beauty, and a few smaller ones, were caught by J. Van Puyenbroeck and his son in Silver Creek, near Hope, last week.

Mr. Ira Serl has purchased Mr. W. Polson's house.

**Road Roller Ruins Plans to Save Service**

Notified of an impending blasting job near Langley Prairie on May 31, a telephone man strung temporary lines along the ground around the scene to take care of service until the copper long-distance wires, probably victims of the blast, could be replaced.

Bang went the explosion; down went the copper wires. But service was carried on via the temporary lines.

Everything went smoothly, just as planned, until a road roller ran over the temporary wires, with the result that the direct circuits from Vancouver to Abbotsford and from Vancouver to Langley were out for two and a half hours.

## PUBLIC OPINION

Nowadays is bitterly hostile to any form of foolishness which endangers life and property. The Reckless Driver, the Man who Rocks the Boat, the Man Who Didn't Know it was Loaded, are gradually disappearing under pressure of public opinion. The Man who is Careless with Fire is the greatest menace of them all. Let public opinion focus upon him.

**Prevent Forest Fires --- You Can Help!**

**British Columbia Forest Service**

### MERCHANTS DONATE SILVER TROPHY FOR FLOWER FESTIVAL

The Fraser Flower Festival movement is winning support everywhere in the district, and as a special contribution from Abbotsford business men, in addition to their donations to the general prize list, they have subscribed \$50 for the purchase of a silver cup to be awarded the exhibitor winning the greatest number of points in the festival. This is, of course, open to amateurs only.

Permanent ownership of this cup depends upon the exhibitor winning highest points for three years in succession, the trophy meanwhile to be held in custody of trustees appointed by the committee.

Secretary Weir has almost completed a draft of the prize list, which covers 74 classes, and offers a total of \$200 in prizes. In gladiolus ten classes are provided, in dahlias seven classes, in annuals (which include zinnias, calliopes, salvia, marigolds, poppies, calliopes, salpiglossis, chrysanthemums, scabiosa, and sunflowers) 14 classes, in perennials (including hollyhocks, delphinium, kniphofia, pentstemon, phlox, coreopsis, carnations, chrysanthemums, thalictrum, gaillardia, gypsophila, and poppies) 13 classes, sweet peas, nine classes and miscellaneous (roses, lilies, pansies, cut flowers, buttonholes, bouquets, table sprays, rock garden miniatures, wild flowers and grasses, house plants, etc.) 10 classes.

Invitations have been mailed to H. J. Barber, M.P., Hon. W. Atkinson, to prominent florists, and to Bellingham, Seattle, and Vancouver floral associations to participate or attend, and the workers for the project are confident that the local public is heartily behind the project, and will do everything possible in "growing flowers, taking flowers, and showing flowers."

List of donors to the Merchant's Cup follows: J. Gilmour \$2; N. Hill \$2; E. A. Barrett \$2; M. C. Switzer \$50; E. S. Plaxton \$2; E. T. Weir \$2; J. Coppling \$2; B. E. Porritt \$1; A. Gosling \$1; H. C. Shafer \$2; C. F. Weir \$2; E. Mann \$1; O. W. Benedict \$1; Abbotsford Bakery \$1; J. Tucker \$1; Dr. McDiarmid \$1.50; Dr. Quinn \$1; E. A. Hart \$1; Brett's Ltd. \$2; A. M. ### DEATH CALLS WELL-KNOWN CHILLIWACK RIVER CHARACTER HIPKOE

REINHOLD HIPKOE, 79, died in Chilliwack hospital on July 12. Deceased is survived by three sons, five daughters, and 15 grandchildren. He was born in Germany, and came to the United States when a young man, residing for a time in Bellingham.

The late Mr. Hipkoe was well and favorably known to hundreds of prospectors, miners, hunters and fishermen who found his Vedder Crossing on the Chilliwack river, a haven of comfort and cleanliness. Many a guest of Mr. Hipkoe's will recall pleasant evenings listening to the old man's narratives of early days up the Chilliwack river, the "big bars" cougars, and grizzly and goat hunting incidents, which the late Mr. Hipkoe could spin with the picturesqueness typical of the seasoned storyteller.

Rev. R. E. W. Biddell, former minister of St. Matthew's church, Abbotsford, conducted the funeral to Chilliwack Oddfellows' cemetery, last Monday.

J. C. Hesselgrave has let contract in Sumas for a concrete building costing \$6,250, to be erected at Cherry and Garfield streets.

The Misses Vera and Flossie Hunt are holidaying at Ocean Park.

Old-Timer Expounds Some High-Pressure Stuff  
Editor News:

Abbotsford had never lacked for boosters, but in its early struggles there wasn't an awful lot to boost. Various gentlemen, not entirely disassociated from the real estate profession, did their best. But one muddy street, a saloon and a few unkempt shacks called for the added assistance of the saloon-keeper to make the stranger see this small portion of the world through rose-colored glasses.

Unkind critics added the words "a horrible death" to our ambitious slogan "See Abbotsford and die" and at one time things became so depressing that the pioneer merchants played long sessions of poker with their customers credit slips and threatening letters from the Retail Merchants Credit Association for counters, while the few settlers contemplated replacing the stumps they had removed and advising the authorities to turn the whole area into a happy hunting ground for the Kilgair Indians.

Now, however, all this has changed, and with the flourishing town it now is, some of the old style of rhetoric could be used effectively in the dissemination of the virtues of Abbotsford. An old-timer would handle the situation somewhat after this manner:

"Step up, ladies and gentlemen, and see the world-renowned city of Abbotsford; oil wells to the west of us; gas wells to the north of us; gold mines all around us. Here are no volcanoes, typhoons, blizzards, mosquitoes, snakes, bugs, earthquakes, sand-storms, income-tax collectors, heat waves or any of those torments, diseases, pests and calamities that afflict the rest of mankind. On the other hand, this is the home of the cheery "eye-opener" and the genial night-cap; here is to be found the best in religion, entertainment, transportation, employment, commerce, recreation, sport. Are you religious? Then we have a complete selection, ranging from Mohammedanism to Almee McPhersonism. Are you thirsty? That slogan "See America first" is obsolete. You may load up in Abbotsford and see Canada at least twice at the same time, and for far less money.

Our Corporation will see that you have all the services of a modern city with none of the handicaps; a garden hose connection on your pantry tap (if not unduly advertised) enables you to enjoy a nominal water rate, while the purchase of a dog license completes your obligations to this great institution. The purchase at a ridiculously low price of one of the few remaining lots guarantees you a home in this Arcadian community and the last vestige of restraint on that perfect freedom of movement necessary to "stepping out" is obtained by the acquisition of a liquor per... a corner lot, did you say, Sir?... right here on the dotted line."

ABBOTSFORD OLD-TIMER

### Curious Optical Illusion

The Duchess of York, 20,000-ton Canadian Pacific trans-Atlantic steamer, is not going to crash the new bridge which, a few days after this picture was taken, was completed across the St. Lawrence in the harbor of Montreal, although the odd result of the photographer's work makes a smash-up seem almost inevitable. As a matter of fact the bridge is actually 26 feet above the tip of the liner's foremast which itself is 30 feet higher than the funnel. The midjet figures of the steel workers on the bridge give another indication of the great height of the structure.

**ABBOTSFORD LUMBER COMPANY, LIMITED**  
EDGAR J. TRETHEWEY, Pres. A. VAN PUYENBROEK, Secretary.

### Carefully-Milled Lumber and Shingles

Are an important requisite of structural workmanship, and are undoubtedly well preference. Labor cost is lower, and your buildings are more durable and permanent. For 20 years the Abbotsford mill has maintained High Quality—and does today.

### American Tourists Heading For Cariboo

Last week, sign-posters of the B.C. Automobile Club started away for the Cariboo with 1,000 signs, which are to be posted over the highway, making for more complete direction of auto tourists. Huntingdon customs officers report the issuing of many game and fish licenses to incoming American tourists, who are heading for the Cariboo in large numbers.

Mr. Ira Serl has sold his tow-boat and returned to Abbotsford, where he has secured a position driving a tractor with the government road crew.

Residents of Abbotsford district are certainly appreciative of the chloride dust-laying treatment given the main streets by the government road-workers. Lower Sumas road is also being oiled and patched, a sorely-needed job.

### Go Away For a Time And See Things

A census of this Abbotsford, Sumas and Matsqui district just now will show about half the population away on motor trips, at the beach, and visiting friends and relatives near and far.

Such an exodus from the home district, without a compensating influx, is slowing up business with the storekeepers, making a lot of rough-and-ready male housekeepers—and puts the local reporter on his metal to obtain news.

But this is the age of travel, and to travel is to live. To sit sloth-like in one place is to see nothing, be nothing, feel nothing, and next thing to know nothing. Travel is education—the most pleasant form of education known to man, for it peoples the heart and mind with pictures that never fade.

Join the others, if you can—get away from the surroundings with which you are so "contemptuously familiar." Get away from the daily grind—go places, see things and learn what people are doing in other parts. Study how other towns do things, how others who make their living as you do yours, conduct their affairs. What you learn depends solely on your natural powers of perception. But regardless, you cannot be the loser for such a venture.

You will note many things in which we of this Abbotsford district are behind the times. But you will also see in relief the many advantages, and most important, the Opportunities open here at home to put into effect measures which have not heretofore been thought of. You will come home with a more balanced perspective of your home district, and your relation to it.

LIARS believe will disappear when she becomes older, the girl is perfectly normal.

EVERYWHERE IN CANADA

## WORLD HAPPENINGS BRIEFLY TOLD

Manitoba contemplates celebrating its diamond jubilee on July 15, 1930. It was announced at Winnipeg by Premier John Bracken.

The London Daily Sketch said Premier MacDonald had refused Leon Trotsky, former Russian war chief, permission to enter Great Britain as he requested recently.

The Japanese naval training cruisers "Ahama" and "Iwate" will visit Vancouver on August 10-12. It was stated at the Japanese consulate there.

Albert Voight, a German, has left Seward, Alaska, in a 16-foot, collapsible walrus skin sail-boat for New York. He hopes to complete his 6,700-mile trip in six months.

Charles Colebrook Patterson, eldest son of the late Hon. J. C. Patterson, former lieutenant-governor of Manitoba, is dead. He was born in Ottawa, in 1868, and for a number of years was his father's secretary.

Flight tests will soon be made of television apparatus calculated by its inventor, C. Francis Jenkins, Washington physicist, to reproduce conditions as seen from an aeroplane, on a screen miles away.

Japan's co-operation in any disarmament program negotiations that Premier Ramsay MacDonald and Ambassador Dawes may have begun has been promised by Premier Tanaka.

France is preparing to bring into force a wide scheme of social insurance. It will cover sickness, old-age incapacity, maternity benefits and, to a certain extent, unemployment.

Captain A. N. Eames, inspector in the Royal Canadian Mounted Police, who has been stationed at Vancouver for some time, has been appointed inspector in charge of the Arctic sub-district, with headquarters at Herschel Island.

Representatives of all the provinces will be called together by the Federal Government next autumn to consider the federal and provincial financial problems, according to intimations received at the Parliament buildings, Victoria.

## Statistics Show Canada Owned By Canadians

No Cause For Alarm Regarding Its Economic Future

Canada is owned by Canadians. Those who view with alarm the economic future of this small population lying alongside one twelve times greater, speaking the same language and enjoying a similar state of material civilization, find reassurance in a statement to that effect issued by the Dominion Bureau of Statistics, at Ottawa. Canadians, it appears, own between 55 per cent. and 65 per cent. of the securities of all enterprises located on Canadian soil. The total British and foreign investment in this country is given as \$5,742,043,000, of which \$2,209,517,000 is credited to British investors. The United States investment exceeds that figure by more than a billion dollars.

At the same time Canadian investments in the United States amounted to \$874,626,000, or more than one-quarter of the American investment here, and this is considered an excellent relative showing. American capital is invested principally in government and railroad securities, the pulp and paper industry, which it dominates, and mining.

**Hunts Grizzly In Spring**  
Hunting grizzly bear in the spring is good sport, according to Walter W. Lang, of Milwaukee, who has returned from the Canoe River country out of Mount Robson, B.C., with one grizzly hide and a couple of brown bears to his credit. It is Mr. Lang's fourth year in this part of the Rockies. He was accompanied on his hunt by Richard Lacey, also of Milwaukee.

**Large Area Photographed**  
Thirty-three thousand, eight hundred square miles were covered in Canada during the season of 1928 by oblique aerial photographs taken by the Royal Canadian Air Force for the Topographical Survey, Department of the Interior.

**Motor Cop—See here, Miss, I've had my eyes on you for some time.**  
Miss—Oh, dear, what a relief. I thought you were going to pinch me for speeding.

"What a strange horse!"  
"Yes. It is a cross between a horse and a giraffe. I win all races on it by a neck!"—Lustige Kölner Zeitung, Cologne.

## Designs On Totem Poles Are Polynesian

Art Of B.C. Indians Similar To That Of South Seas

What strikes one most of all in looking at the arts and crafts of the British Columbia Indians is the general "Polynesian" character of the designs.

The totem poles are obviously related to those of New Zealand, the models of canoes and painted paddles recall the South Seas generally, and in some of the stone carvings there are hints of Easter Island.

On the other hand, the carvings in ivory and horn appear to link on to the early Chinese jades.

If these impressions are just they support the suggestion which has been made of a "Pacific" school of art, antedating the earliest Chinese art we know; and we might venture that whereas partly through Greek and Indian contacts, Chinese art went on developing, the arts and crafts of British Columbia remained more or less in the Pacific phase.

It is said that the Indians of British Columbia differ from those of other parts of Canada and the United States by a definite Mongolian influence.

Further it is known that the Russians were early visitors to British Columbia, and, sure enough, in the carved shafts objects there are distinct affinities with "Scythian" art.

Owing, possibly, to the complete absence of pottery among these Indians, basket weaving appears to be the art that developed most consistently, baskets closely woven of cedar bark being used for cooking and carrying water; and their decoration, generally geometrical, but occasionally representing natural forms—as of the skua gull—in a convention arising out of weave, throwing light upon the supposed origin of pottery—out of basket-making, first by daubing the basket with clay, and then by using clay alone, the decoration being transferred from one medium to the other.

## Facts About New York

Interesting Statistics contained in Book Just Completed

Residents of New York City eat 7,000,000 eggs a day, pick up telephone receivers 190 times each second, drink 2,659,632 quarts of milk every 24 hours and get married at the rate of 14 couples an hour during the daytime.

These statistics are contained in "The Story of New York Today," just completed by the Merchant's Association. The object of the book is to let the rest of the Nation know the extent of the activities engaged in by New York's 6,056,000 population.

THE NEW PEPLUM BLOUSE

Simple blouse of printed blue crepe with peplum shaped so as to give smooth flat neckline. Shirring at each shoulder and bow trimming are charmingly feminine details. Style No. 464 can be copied with 1 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting in the 36-inch size. The pattern which is so easy to understand, can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Off-white, ivory tone in crepe satin is stunning to wear with black pleated silk crepe skirt, or black flared silk crepe jacket costume. Printed voile, handkerchief linen in lime shade, vivid red crepe de chine and georgette in modernistic print in foliage green are attractive ideas. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cute designs for the kiddies.

## A Remarkable Hotel

Built On Swiss Alps and Is 11,480 Feet Above Sea Level

One of the most remarkable hotels in the world is the Jungfrau, perched high up on the Jungfrau, in the Bernese Alps, Switzerland, 11,480 feet above the level of the sea. Built of stone and iron, the hotel is welded, as it were, into the sheer rock of the famous mountain. Shows surround it eternally, and, in winter, it is buffeted by the fiercest blizzards of the Alps. But it gives hospitality and warmth to climbers and to the tourists who visit the mountain by the funicular railway from above Interlaken. From the windows of the hotel lounge one often looks out upon a world of clouds, through which some of the high peaks of the Bernese Oberland stand out like rugged islands.

Nearly every member of the hotel staff is an expert mountaineer. For though the funicular runs to within a short distance of the hotel there are often long spells during the winter when the heavy snows prevent all communication with the outside world. Then, the only means of reaching civilization is by ski along dangerous mountain tracks. The Jungfrau hotel had its origin in a ramshackle shelter but built by workmen when engaged in the construction of the funicular in 1912. From this dwelling where they ate their simple meals of beer and bread has arisen the hotel that is unique in the world.

## Recipes For This Week

(By Betty Barclay)

### BOSTON STEAMED BROWN

**BREAD**  
1 cup graham flour.  
1 cup corn meal.  
1 cup flour.  
1 teaspoon salt.  
1 teaspoon soda.  
1 teaspoon baking powder.  
3/4 cup sorghum or molasses.  
2 cups sour milk.  
Mix and sift the dry ingredients. Mix milk and molasses and add last. When well mixed, fill buttered mold half full. Cover tightly and steam for three hours. Unmold and place in moderate oven for 15 minutes. Serve hot or cold.

### FRUITY CREAM CUSTARD

4 oranges.  
2 eggs.  
1/4 cup sugar.  
2 teaspoons flour.  
1/4 teaspoon salt.  
2 cups milk.  
1/2 teaspoon vanilla.  
5 tablespoons sugar.  
Beat egg-yolks, add 1/4 cup sugar, flour and salt and mix thoroughly. Add milk and cook in double boiler until thick enough to coat spoon. Cool, add vanilla and turn into serving dish containing peeled and sliced oranges. Beat egg-whites with 5 tablespoons sugar. Heap on top of custard and serve.

## Canadian Delegates For Press Conference

Dominion Will Have Largest Representation At Imperial Meet Next Year

J. H. Woods, managing editor of the Herald, Calgary, Alta., recently sailed for London, where he will consult with the council of the Empire Press Union in connection with the Canadian contingent of press delegates to the Imperial Press Conference, being held next year. Mr. Woods said that Canada will be sending 20 delegates to represent the 60 members of the Union in Canada. This is the largest representation of any part of the Empire. The last conference was held in Australia in 1925, and the one previous to that, in 1920, was held in Canada. The Imperial Press Conference is being held in London, England, in June of next year.

**How Names Were Given**  
Europe is derived from Europa, in Greek mythology a woman who was carried off by Jupiter, who came to her disguised in the form of a white bull and bore her to the island of Crete. The Greek word is said to be derived from the Semitic 'ereb' meaning darkness, evening sunset. Asia is said to derive its name from the Semitic word 'asu' meaning going forth, or rise of the sun.

**Trail Riding In Rockies**  
Trail riding is one of the favorite pastimes of the national parks in the Canadian Rockies. This is one of the best ways of seeing all, or most of the points of interest. In Banff, trail trips of ten, twenty-five, or fifty miles may be taken by the visitor on horses trained to the work and altogether trustworthy.

**Advertising Their Goods**  
Along with advice issued by other producers to consume their products and enjoy a happy married life, greengrocers in London, England, are urging customers to "Eat oranges and be happy at home." "Eat our peaches if you want him to propose." "Plums for breakfast mean a good day's work." "A cauliflower a day means a magnetic personality."

"A man has the right to control his wife," states a judge. And a left to defend himself if she resents.

## AMBASSADOR MAKES DECISION

Sir Esme Howard, British ambassador to the United States, has announced that he will not sign any more liquor requisitions for the embassy at Washington, thereby waiving the diplomatic privilege of importing liquors.

## The Tariff Problem

New York Banker Would Like To See An Independent Commission Appointed

Difficulties between Canada and United States concerning the tariff problem can be removed only by an independent commission composed of tariff experts from each country, said M. H. Cahill, New York, president of the New York State Bankers' Association, in an interview in Toronto.

Mr. Cahill said that this is the opinion held by United States bankers. He hoped that the proposal would meet with the approval of Canadians.

"But take the matter out of politics," he continued. "Take it out of the hands of legislators, who have neither time nor energy to study it."

He expressed the opinion that the tariff question is the only obstacle keeping the two countries from more friendly relations. Otherwise, he said, no United States citizen can feel himself a stranger in Canada. The present friendly ties between the two countries must be maintained, Mr. Cahill continued. Business in this country, he said, was, as usual, full of favorable signs.

## The "Canadian Mediterranean"

Montreal Journal Sees Important Future For The H.B.R.

Commenting on the completion of the Hudson Bay Railway, Le Devoir, of Montreal, edited by Mr. Henri Bourassa, expresses the belief that the new line to the Canadian Mediterranean will prove a valuable addition to Canada's transportation system, not only as a development road, but as an export route. The richness of the country through which the railway passes has already been proved, Le Devoir states, foreseeing large mineral, pulp and paper, and metallurgical establishments along the road. It applauds also the manner in which the Government is amassing data on the navigability of the Bay, and concludes: "It is improbable that the route will become a serious competitor of the St. Lawrence, but it is sure to be useful, and will become so more and more as seamen become familiar with navigation conditions."

## To Drive Last Spike

Hon. Geo. P. Graham Will Probably Accept Invitation To Officiate At Completion Of H.B.R.

Right Hon. Geo. P. Graham recently announced that he would probably accept the invitation extended to him by the Minister of Railways and Canals to drive the last spike upon the construction of the Hudson's Bay Railway, some time during the coming autumn.

As minister of railways and canals in the Laurier administration, Senator Graham had much to do with the development of the scheme now approaching completion, turned the first sod upon the extension, from The Pas, Man., northward on September 6, 1910, and still has in his possession a shovel suitably inscribed, which was presented to him on that occasion.

## Signs Point That Way

After shaking hands at the depot one colored man inquired of another: "Didn't you marry de widow Jones de first of January?"

"Dat's me—I did," was the answer, "but I done left her."

"Why, how's dat?"

"Well, de fust week she called me honey, de next week she sukked around and called me old Richards, de third week she cum for me wid a flatiron, an' I use kinder got a hunch she don't like me."

**Praise Canadian Hospitality**  
Pilgrims of the British Free Churches after seven days' travel and study left Montreal for the old country, voicing praises of Canadian hospitality. They came to Canada at the invitation of the United Church of Canada to see for themselves how church union was working out.

Hungary will give government aid to its shipping companies.

## Claims Canadian Methods Popular

Eyes Of World Fixed On Dominion Says French Civil Engineer

The eyes of the world are today fixed on Canada, as on the land that offers plenty of opportunity to men of progress and enterprise, according to Jean Pochat, civil engineer and industrial expert of Paris, who, with L. M. Souget, commercial technician, has come to America to investigate thoroughly and fully the industrial and commercial methods of both Canada and the United States.

When seen at the Windsor Hotel, Montreal, Monsieur Pochat declared that he had been prompted on this trip by the constant demands that are made on his consulting bureau by eminent industrialists and business men of France, who are anxious to apply the modern methods and business principles in use by Americans and Canadians to French industry and commerce.

"There is no more talked-of country in Europe than Canada," said the visitor. "The prominent part taken by your statesmen at Geneva, the marvelous development of your country during the first quarter of the Nineteenth Century, have contributed to the reputation you have among Europeans and, particularly among the French. Now that France is entering into a determined era of progress and development, its industrialists and tradesmen are most anxious to introduce into their methods of business, the very successful innovations due to the invention and progressive genius of your business leaders. The demands for information at my consulting office have been so numerous about these, that I decided, with my friend, Mr. Souget, to come to America to investigate personally. We will pass a few months travelling through Canada and the United States, visiting the more important industrial and commercial establishments, gathering all the available data applicable to French business life."

## Honor Belongs To England

Frenchman Did Not Originate Idea Of Artificial Silk

Most of the credit for the idea of manufacturing artificial silk goes to France, and the honor has usually been given to Reaumur, a French naturalist. Actually, the first known suggestion was made by an Englishman, Dr. Robert Hook. In 1664 he published a book, "Micrographia," in which he described a microscopic examination of real silk, and suggested the possibility of producing a similar thread by mechanical means. The first machine to produce an artificial thread was made in England. In 1840, Mr. Louis Schwabe took out the first patent and erected his machine, embodying spinnerettes, in Manchester, but the product failed to attract and Schwabe committed suicide three years later. Today the spinnerette is in full use, and £135,000,000 is invested in the industry in England alone.

## Germans Invent New Ship

Safer and Cheaper Than Existing Models Is Claim

A new kind of ship is being built by a German ship building company, which, it is expected, will be safer and more economical than existing models. The feature of the invention is the unusual shape of bow and stern, designed to press water down rather than to each side, and to reduce friction on the sides. It is said to cause the water to flow by the shortest route from bow to stern. Three high-sea fishing trawlers recently have been built by Deschimag on the new principle. The builders announce that not only is the fuel consumption reduced 25 per cent. compared with other vessels of equal size, but that rolling and pitching even in heavy seas is reduced to an extent not previously attained. Test trips also have shown excellent steering capacities.

## Would Be Wise Course

Consolidation of Nova Scotia, New Brunswick and Prince Edward Island into a single maritime province, with possible inclusion of Newfoundland, is seen by Sir John Aird, president of the Canadian Bank of Commerce, as a wise course for the maritimes to pursue both in respect to their industrial growth and the exercise of their administrative powers.

There's no such thing as luck. What makes for the prosperity of the city as well as the individual is to do his work right and well.

## To Make Huge Flagpole

Giant Stick Of Timber Shipped From B.C. To Toronto

A giant stick of timber, from which when converted into a flagpole the Union Jack will next year float at the Canadian National Exhibition, Toronto, was successfully loaded on the Canadian National S.S. Canadian Ranger, which has taken it to Montreal, whence one of the Canada Steamship Line steamers will convey it to Toronto.

The stick, which is second only in size to that donated a few years ago to Kew Gardens, London, England, was located on the timber limits of the Timberland Lumber Company, on Vancouver Island, and has been donated to the Exhibition as an advertisement of the huge size of British Columbia trees. It will be kept a year to thoroughly season and when trimmed down it will measure 184 feet in length, 34 inches diameter at the base and 10 inches at the top.

To stow such a huge timber required some skill, as the big stick is longer than the open deck space on the vessel. It was, however, loaded without any mishap on the top of deckload of lumber, on the "Canadian Ranger" at the Burrard Drydock.

## Honor Belongs To England

Frenchman Did Not Originate Idea Of Artificial Silk

Most of the credit for the idea of manufacturing artificial silk goes to France, and the honor has usually been given to Reaumur, a French naturalist. Actually, the first known suggestion was made by an Englishman, Dr. Robert Hook. In 1664 he published a book, "Micrographia," in which he described a microscopic examination of real silk, and suggested the possibility of producing a similar thread by mechanical means. The first machine to produce an artificial thread was made in England. In 1840, Mr. Louis Schwabe took out the first patent and erected his machine, embodying spinnerettes, in Manchester, but the product failed to attract and Schwabe committed suicide three years later. Today the spinnerette is in full use, and £135,000,000 is invested in the industry in England alone.

## Both Trades Benefit

Tramp Steamers From Vancouver Carry Grain And Lumber

A feature of the grain trade development of the port of Vancouver is pointed out in the harbor board figures on shipments in the grain traffic over the past 15 months. Parcel shipments are increasing and full cargoes are reducing. The tramp vessels are now taking lumber above and grain below decks and this is proving beneficial to the basic lumber trade as well as the grain export business.

## Makes For Unemployment

One of the causes of unemployment in Europe is that our working lives have been prolonged, declares a statistician. At one time, he says, "too old at forty" was the cry throughout the world, but we have now found that we are not too old at 60 or 65.

"What would you say to anyone who sits himself down on your hat?"

"I should call him an idiot a stupid ass."

"That's all I wish to know — you are sitting on mine!"

## Montreal To Have Giant Terminal

Will Solve Traffic Problems Of Canada's Largest City

The bill for the new Canadian National Railways Montreal terminal, which will admit of enlargement to a capacity equal to that of the present New York Central terminal in New York, exclusive of the latter's special suburban area, has passed the Senate and now has full parliamentary sanction. This, at a cost of \$50,000,000, will give Montreal a terminal comparable with any in America.

The Canadian National terminal will be set just below St. Catherine Street, between the shopping and financial districts of Montreal. Its construction will change the entire lay-out of the central portion of the city and by its connections underground and by overhead viaducts through the city, will offer a solution of some of the present urgent traffic problems, both freight and passenger, of Canada's largest city.

At present freight is only shifted between the east and west sections of Montreal on the Canadian National lines by use of the heavily loaded lines of the harbor railways or by a haul over the company's own lines to Turcot via Joliette, Rinfret and Eastern Junction, a distance of 108 miles. The building of 17 miles of new line in connection with the new terminal will reduce this distance to 20 miles, effecting great economies in time and cost. In addition new industrial and residential districts not presently served by any transportation facilities will be rendered available.

The intention of the Canadian National is to offset much of the expenditure of \$50,000,000 by leasing the surface areas above the tunnels which will connect with the station. It is pointed out that the New York Central have adopted a similar plan in leasing the surface areas near the Grand Central Terminal in New York.

The station facilities will be almost entirely below ground. New streets will be built running through or over the structure. A double tube subway for vehicles will be provided running from south to north on St. Catherine Street. All the locomotive power will be electric.

Sir Henry Thornton, president of the Canadian National Railways, has stated that the plans admit of the operation of the terminal jointly, if the Canadian Pacific Railway decides later to enter into the project.

## Travels Of A Hat

Bearing the following message and 65 labels, a hat travelling around the world arrived at Aberdeen, Scotland, recently. "I am on my way. I don't know where, and I don't care where I roam, so give me a lift and send me along, and someday I'll roll home." The hat was being sent around the world by a man in Dallas, Texas. It has been all over the United States and Canada.

## University Of Alberta

The University of Alberta has just celebrated its twenty-first birthday. The first president, Dr. H. M. Tory, now president of the National Research Council of Canada, and the first premier of the province, Hon. A. C. Rutherford, participated in the anniversary ceremonies.

It is no good being good unless you are good for something. The tragedy is not in not knowing, but in not knowing that you don't know.

## WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds plant coverings and greenhouses. It keeps out cold — will not crack or chip — cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

Distributors: JOHN A. CHANTLER & CO., LTD. 51 Wellington St. W. TORONTO, ONT.

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has the most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last few years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

**When Baby Comes**

## The Singing Fool

By HUBERT DAIL  
Copyright, 1928, Warner Bros. Pictures, Inc.

### CHAPTER I.

Cool gray dawn of a work day in the modern Babylon—New York. The black curtain of night rose silently, seeming to trail ghostly spirals of mist. Against the sky's flat monotone the irregular and fantastic shapes of the skyscrapers stood out boldly—powerful and mysterious creations of Man.

In the dark canyons of the city streets dark figures moved purposefully toward their destination—factory hands with lunch kits tucked beneath their arms, stalwart steel-structure men who carried the pride of craft in their way of walking, slim girls with the vivid memory of the night's romantic dreams still shining in bright eyes.

But uptown, in the glittering play places of the city, was a sharply contrasting scene. In the "roaring forties" and "fifty fifties," where denizens of Broadway and fashionable Park Avenue "make whoopee" through the sleeping hours, the night clubs were ending their day. Through the tinselled doorways came lovely ladies in ermine coats and jeweled slippers, and men with silver-topped walking sticks, and top hats at rakish angles. Their heavy listlessness was broken occasionally by hysterical laughter.

In the lobby of the resplendent Plaza Club, Marcus, the revue producer, helped a pretty young actress into her fur coat. As he did so his arm went around her lingeringly for a moment, while she turned her graceful head and glanced knowingly into his eyes. Another man and girl of the Marcus party waited nearby.

"Well, let's call it a night," suggested Marcus, his hand resting affectionately on the girl's arm.

"No—ple-ase! Let's not go home. We can have lots of fun yet."

Her tone was wheedling, her smile gay. She was playing up to Marcus, first, because he was the great Marcus, secondly, because she wanted her own way. And now she turned to the other couple.

"Don't let him send us home yet," she said in the tone of a spoiled child. "We're having fun. We can go to some other place."

The other man and girl nodded, and the actress turned to Marcus.

"You see!"

Marcus sighed, then made one last stand.

"All the other places will be closed," he insisted.

"No, they won't. Blackie Joe's is open—the fun is just starting down there."

The revue producer made a grimace of distaste. "But that's such a dump."

## From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful! I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."

—Mrs. Milton McMullen, Vanessa, Ontario.

**Lydia E. Pinkham's Vegetable Compound**

Suddenly the actress seized Marcus by the arm and led him toward the doorway. She spoke rapidly and soothingly into his ear:

Marcus acquiesced with a faint smile and a characteristic shrug of the shoulders. The chauffeur of his handsome limousine sprang to attention and swung the car door open as the party came down the steps. They stepped inside and the car purred away.

Inside, Marcus felt the girl's head on his shoulder. He put up his hand and stroked her glossy hair, keeping his eyes straight forward. Yes, he liked her, but he liked many women. Primarily, this shrewd revue creator was interested in women as talent for his gorgeous productions. His gift for "spotting" talent had made him Broadway's most notable figure in his line. To be "discovered" by Marcus meant fame for any girl.

The car drew to a stop before the shabby exterior of Blackie Joe's place; the party mounted the narrow, unpainted, somewhat rickety stairs; at the top the peep-hole panel of a locked door was pushed aside in response to Marcus' knock. The suspicious eyes of the door-keeper looked them over, then cautiously swung the door back.

Inside the tiny lobby they surveyed through another doorway, a smoke-filled room and a crowded dance floor, where closely massed figures undulated to the muffled but insistent rhythms of jazz music. An odor of stale beer greeted them, and again Marcus made a grimace of distaste, which he quickly stifled. When the check girl had taken their wraps they moved toward the main room.

This was slumming with a vengeance, thought the fastidious Marcus. In contrast to the brilliant and richly upholstered club they had just left this hideaway of the downtown back streets seemed strangely threadbare and woebegone.

The producer did not like the appearance of some of the patrons. As his party entered the low-ceilinged main room the dance music stopped and the couples threaded their way back to their tables. A curious and rather sinister quietness pervaded the room for a moment; Marcus and his expensively garbed friends were met by lowering stares that seemed threatening.

Marcus' keen, darting glance caught the covetous gaze of a man at a nearby table fixed on the heavily jeweled hand of his actress friend. Without a word the producer stepped in front of her protectingly. And then—

Suddenly the figure of Blackie Joe himself appeared across the room. He strode toward them rapidly with his best welcoming smile.

"Well, Mr. Marcus, this is a great honor!"

Marcus relaxed with a sigh of relief and took Blackie's outstretched hand. Blackie turned toward the back of the room, calling:

"Hey, Al! Ringside table for four!"

Al Stone, the head singing waiter and prize comic at Blackie's place, spun about. From their appearance these were important people.

"This way, ladies and gentlemen. Here's a nice spot."

The party relaxed about the round, white-topped table. Then Marcus, czar of the Broadway revues, turned to give the order. He looked up into the handsome, intelligent face of Al Stone, the obscure performer. As he did the actress next to him whispered, "Four beers?" Marcus nodded and repeated the order to Al.

The waiter straightened up and looked about for Blackie. These people were important, but he couldn't fill the order until he had the high sign from Blackie. He caught Blackie's eye and saw his right hand go up with the okay gesture. Then he turned away.

Who were these people he wondered, toward whom the boss behaved so deferentially? Well, it didn't matter. You could see, to look at them, they had plenty of jack. Later he would sing one of his best comic songs for them. They would probably loosen up with a good tip.

Someone else was speculating on the Marcus party, too. In the background, several tables away, stood Grace Farrell, the cigarette girl, her slim fingers resting on her tray, which was suspended from her shoulder by a wide ribbon. Her eyes were wide with awe, for she had heard Blackie Joe whisper the words, "Marcus of Broadway."

So this was the legendary Mr. Marcus, who made performers famous. But the thoughts of little Grace were not for herself. They were for Al Stone. Even as Al leaned over to take the Marcus order her gaze had been alight with admiration for the singing waiter. If only Mr. Marcus knew how smart Al was, how funny he could be, what wonderful songs he wrote!

She tried desperately to catch Al's eye. She must reach him and tell him the name of this distinguished personage!

(To Be Continued.)

**Supplying Exact Time**  
Throughout the various government buildings at Ottawa, there is a system of over 600 clock controlled directly from the Dominion Observatory. The majority of these take the form of "minute dials," whose hands are actuated electrically once each minute; the exact instant when the hands move marks the beginning of the minute.

## I've forgotten I ever had any nerves

Your doctor will tell you how the act of chewing relaxes and soothes strained nerves, and how the healthful cleansing action of Wrigley's refreshes and tones you up all round. Aids digestion.

## Fifty-Nine Annual Payments For Germany

Would Save Millions If War Debt Could Be Cancelled Now

After 15 years of uncertainty, Germany now knows the total of her war bills to foreign countries, which began to pile up when her armies crossed the Belgian border in 1914.

Four months of labor by an international committee of financial experts has produced a plan—known as the Young plan—under which Germany will make 59 more annual payments to her creditors, Great Britain, France, United States, Japan, Italy, Belgium, Rumania, Yugoslavia, Greece, Portugal and Poland. The annuities for the first 37 years will average about \$492,000,000, and for the remaining 22 years, about \$408,000,000, or a total for the 59 years of about \$27,000,000,000. The experts place the present value of Germany's 59-year note at \$8,879,040,000. That is to say if she could pay up at once, the creditors would accept less than \$9,000,000,000, and cancel the whole debt.

The annuities fixed by the Young plan represent a considerable cut in Germany's payments which, under the Dawes plan, in force since 1924, were about \$600,000,000 per annum.

The new plan wipes out the Dawes plan and all other treaties and agreements regarding liquidation of the German war debt. The plan is designed by the experts, all of whom have signed it, to come into effect On September 1, of this year, and operate until March 31, 1938, when the final payments will be due.

## New Record For B.C. Fruit

Crop Last Year Shows Big Increase Over 1927

British Columbia is producing 233,598,000 pounds of fruit a year, according to figures for the 1928 crop just received, which show a new record, beating the 1927 total by 34.28 per cent. The province's total agricultural production was worth \$58,564,243 in 1928, and of this the province exported more than \$10,000,000 worth, a gain of a million and a half over 1927. Vegetable production alone showed a slight drop. Grain, foddery, poultry products, dairy output, livestock and meat production all increased.

## A Billion Bushel Wheat Crop

James A. Stoneman, a new member of the board of grain commissioners, stated here that the day is soon coming when the prairie provinces of Canada will produce a billion bushel wheat crop. One of the reasons for this prediction was the more intensive farming methods that are being adopted.

**Time Has Tested It.**—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

Only half the quantity of sugar will be required to sweeten stewed fruit if it is added after the fruit is cooked, not while it is cooking.

By advertising your wrongs you will merely add to your collection.

## A Severe Attack of Dysentery Checked by 4 Doses

Mr. I. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes: "My child, when only seven months old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use Dr. Fowler's."

On this day his bowels had moved twenty-three times in eleven hours, but four doses checked it.

"A short time ago we offered it to a neighbor whose baby was troubled, and it too was relieved within thirty hours."

"We both always keep a bottle of Dr. Fowler's handy at all times. This medicine has been on the market for over 80 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont."

## Canada's Highways

Improved Roads Nearly Four Times Total Of Railway Mileage

Some interesting information was sent to the members of the Canadian Good Roads Association, Montreal, in preparation for their annual convention, which is to be held in Charlottetown, P.E.I., on September 17, 18 and 19 next.

It was pointed out that Canada today has 155,753 miles of improved roads, or one mile for every 61 of her population. If all the automobiles owned in the country were placed on these improved highways at one time, there would be only six cars to each mile.

The Canadian people are building improved highways, at the rate of more than 6,000 miles each year. During 1928 it is estimated that 6,000 miles of improved highways were completed. This year the program is even more extensive, and it is expected that 7,600 miles of improved highways will be finished during 1929.

Canada's improved highways are nearly four times the total of her railway mileage, and the total mileage of all highways in Canada is ten times her railway mileage.

These facts have been gathered by the Canadian Good Roads Association officials to illustrate the tremendous growth in transportation in this country, outside of railways and water carriers. They will form the basis of several discussions at the convention in Charlottetown. The members of the association who assemble there come from every province in the Dominion. Some of the leading officials of the association are those who are employed by the various provincial governments in highway work. Every minister of highways in the nine provinces will try to be present, and if not will be represented by his chief officials. The leaders of the Canadian Good Roads Association have felt that their organization can do its best work by co-operating closely with the men who have to spend the money in the various provinces in highway improvements. Hitherto meetings have been held in every other province, except Prince Edward Island.

## Fighting Battles Of Humanity

Science Playing Important Part In Lengthening Span Of Life

At first glance it may sound fantastic to say that 100 years will be the prime of life, but it should be remembered that such an age was comparative youth in Biblical times. We have gradually shortened the life span as we have adopted artificial modes of living, unsuitable clothing and ruinous dietary habits. Easy living has also played its part. Nature was given a chance in Old Testament days. There is little chance that the public will ever be induced to go back to the natural mode of living which made such men as Methuselah possible. A substitute, however, is arising for Nature, and its name is Science. This great modern force is fighting the battles of humanity; it is attacking man's greatest enemy, disease, and it is winning its fight. Almost daily, new discoveries come to light which make us safer from the ravages of harmful bacilli, which show us how to avoid contagion, and which fight disease, once it is contracted. This work will go on and on, and it is on this fact that Professor Klotz bases his prophecy.—Border Cities Star.

## Britain Likes Canadian Honey

Is Growing In Popularity Says Assistant Trade Commissioner

"Honey is fast becoming a staple food on the British breakfast table, and the Canadian product is enjoying a growing popularity," writes Lester S. Glass, assistant trade commissioner at Bristol, in an article in the "Commercial Intelligence Journal." White clover honey and orange blossom honey are well thought of and South American white honey enjoys a high place in the estimation of the buying public. The British statistics for the calendar years 1924 and 1927, show a total import of honey of 73,251 cwt. and 84,415 cwt., with a value of £201,962 and £221,067 respectively.

## Growth Of Co-Operative Movement

Two years ago the province of Manitoba had 10 incorporated consumer's co-operatives, now there are more than 50, with others in process of formation. New associations have recently been incorporated at six points. One association which started in southeastern Manitoba last spring with capital of only about \$100, has already transacted a business of more than \$20,000, with net earnings of \$1,200. The 40 members decided to leave the surplus with the association this year instead of paying either share or patronage dividends.

## A Good Attraction

Circuses are passing up a good prospect in an English girl, Miss Kathleen Harcourt, 15, nicknamed "Miss India Rubber." She is five feet six inches tall, and by stretching she can add seven inches to her stature. Her arms will stretch three inches and her legs four. Other than this abnormality, which physicians believe will disappear when she becomes older, the girl is perfectly normal.

## "Skinny" Women! Gain Weight Quick

New IRONIZED YEAST adds pounds in few weeks. Results guaranteed—or pay nothing

Why let a "skinny" body, bony limbs and ugly hollows ruin your charm? Ironized Yeast adds 5 to 15 pounds often in few weeks; clears your skin; banishes wrinkles; gives you new strength. People ask—how does Ironized Yeast work so fast?

Ironized Yeast is two great tonics in one. Weight-building YEAST treated with two kinds of strengthening, blood-enriching IRON used for years by highest medical authorities. The Yeast is also treated with Violet Rays to increase its effectiveness.

Only when Yeast is Ironized is it most effective. Iron is needed to bring out the weight-building, strengthening values of Yeast.

Pleasant tablets. No "yeasty" taste. No gas or bloating.

No excuse to stay "skinny," weak or plumply. Feel and look years younger. Get full size treatment of Ironized Yeast today from any druggist. If not delighted with quick results, get your money back. If inconvenient to buy from druggist, send \$1.25 direct to Canadian Ironized Yeast Co., Ltd., Fort Erie, Ont. Desk 426-MX.

## More Than Mere Water

John Burns Described Thames River As Liquid History

The fact of Mr. John Burns having recently celebrated his seventieth birthday recalls to memory a story that used to be current about him when he sat in Parliament as Labor M.P. for Battersea. An American and a Canadian had been shown over St. Stephen's by J. B., who was entertaining them to tea and talk on the Terrace. "What do you call this?" asked the American, indicating, with a contemptuous thumb, the Thames. "Only the greatest river in the world," said Burns. "You call that a river!" exclaimed the Canadian. "Say, did you ever see the St. Lawrence?" "And," chimed in the American, "have you ever heard of the Missouri?" "I've seen them both," was Burns' answer. "The St. Lawrence is mere water; the Missouri is mud; but"—stretching out an eloquent arm—"this is liquid history."

## Little Helps For This Week

"My little children, let us not love in word, neither in tongue; but in deed and in truth."—John iii. 18.

Let nothing pass, for every hand must find some work to do; Lose not a chance to waken love. Be firm, and just, and true. So shall a light that cannot fade Beam on thee from on high. And angel voices say to thee, These things shall never die.

—All the Year Round.

There are little things that leave us little regrets. I might have said kind words, and perhaps have done kind actions to many who now are beyond the reach of them. One look on the unfortunate might have given a day's happiness; one sigh over the pillow of sickness might have insured a night's repose; one whisper might have driven from their victim the furies of despair.—Walter Savage Landor.

"Do you know any really interesting people?"

"No, they're just like you, most of them."

## Competing For Gold Cup

Many Swimmers Will Try England-To-France Crossing This Year

The channel-crossing season is on again. What Julius Caesar did in a boat in 55 B.C., and Gertrude Ederle did in a bathing suit in 1926, A.D., has been done twice this year on pontoon bicycles, and at least a score of swimmers are in training to do what has not been done since 1923—the swimming of the English Channel from England to France instead of vice versa.

Two bakers, a mattress maker, a nursemaid and a Bohemian mechanic have splashed their way from the coast of France to the coast of England, and it is getting to be old stuff.

This year the really ambitious swimmers are out to perform the more difficult feat of starting from England and finishing in France, unfavorable currents to the contrary notwithstanding.

Among the men and women who have announced their intention to compete for the gold cup offered for the first England-to-France crossing this year are several who in previous years accomplished the France-to-England crawl.

Other aspirants for channel fame in 1929 include a middle-aged woman with a family of eight, an 11-year-old schoolgirl, a one-legged swimmer and an athletic though white-bearded gentleman of 60.

## A WARNING TO MOTHERS

Watch the Health Of Your Little Ones At All Times

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen the severity of these troubles. The mother should be constantly on her guard to prevent childhood ailments, or if they come on suddenly as they usually do, to have the means at hand to relieve them. Thousands of mothers have found Baby's Own Tablets the ideal remedy for little ones—thousands of mothers always keep the Tablets in the house as a safeguard against the sudden illness of their little ones.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels; sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth easy. The Tablets are absolutely guaranteed free from injurious drugs and may be given to the youngest child with perfect safety. They are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Turner Valley Oil

Now Producing At a Rate Of Over 830,000 Barrels Annually

In April, 1929, the Turner Valley produced 54,904 barrels of crude oil, making a total of 769,207 barrels of oil and naphtha during the month. This is at the rate of over 830,000 barrels annually compared with 481,000 in 1928. From the present rate of increase it seems likely that the Turner Valley will produce well over 1,000,000 barrels this year.

A man, as he manages himself, may die old at thirty or young at eighty.

## Big Aviation Merger

Saskatchewan and Alberta Interests Will Make United Bid For Mail Contract

In the biggest aviation merger in the history of western Canada, commercial aviation interests of Saskatchewan and Alberta have united under the name of the Great Western Airways, Limited, according to announcement made by Capt. Fred. R. McCall, managing director of the Calgary Flying Company.

Commercial Airways, Ltd., Edmonton, and Commercial Airways, Ltd., Regina, decided at a meeting in Regina, to pool their interests with the Great Western Airways, Ltd., Calgary, and make a united bid for the trans-Canada air mail contract.

Arrangements have already been completed for financing the Dominion mail contract to the extent of \$1,000,000 if it is awarded, Capt. McCall announced.

The Great Western Airways will function as one company under the general management of Squadron Leader G. H. Tudhope, who is at present supervisor of airports and airways for the Dominion government. He has accepted this position with the new aviation merger.

For sunburn—apply Minard's Liniment.

"I did what I could, Tony—I told her you had more money than sense."

"And what did she say?"

"She asked me if you had any money."

"Sometimes we sit and wonder," says "Life," "if the accordion was invented by a fisherman who couldn't make up his mind about the size of the one that got away."

"I told her you had more money than sense."

"And what did she say?"

"She asked me if you had any money."

## SKY TESTED

Your modern high-speed motor hums the tune of faster transportation. In speed, power and flexibility, the motors of the highway reflect the influence of the motors of the sky.

The oil that was "good enough" for the motor of 1925 is not good enough for the motor of 1929. Higher speeds, higher temperatures, higher compressions, have created more difficult lubricating problems and demand better oil.

Because Marvelube meets the high temperatures and high pressures of airplane operation it is the ideal lubricant for the modern automobile engine. Its rich lubricating properties are inherited from its base—Peruvian Crude.

On the highways as in the skyways, Marvelube gives smoother performance, lessened depreciation and real operating economy.

There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. See the Marvelube Chart at Imperial Oil dealers and service stations.
